Aggregates hidden from everyone including interviewers
Yes
Super Admin runs compute-normalisation
For each interviewer compute mean and standard deviation
Evaluation count at least 8
Yes
Standard deviation at least 3
Yes
z = (raw - mean) / sd
normalised = 50 + 10z, clamped 0–100
No
Fallback to raw, note zero_variance
No
Fallback to raw, note insufficient_data
Applicant final = mean of normalised across evaluations
Spread across panel above 25
Yes
Flag HIGH_DISAGREEMENT
Review queue, sorted flagged first
Committee decision recorded with reason
No
Standard record
Score band
55 to 75
Any criterion at or below 2 of 5
Auto-exclude
Above 75
Below 55
Below threshold
Auto-shortlist, minimal discussion
Ready for allocation
