
Super Admin runs allocation
Pre-flight gates
Advisory lock held
ALLOCATION_IN_PROGRESS
Any interview not COMPLETE or voided
PREFLIGHT_FAILED: resolve interviews first
Shrinkage not computed
PREFLIGHT_FAILED: compute adjustment first
A department has no capacity set
PREFLIGHT_FAILED: set capacities
All clear
v1 ERROR: ranking stopped at score, so ties made re-runs return different valid results
Indefensible in a dispute
Acquire advisory lock on allocation colon cycle_id
Applicant lists: their ranked department choices
Department lists: build a TOTAL order
1. final adjusted score, descending
2. count of interviewer recommendations for this department
3. panel score spread, ascending, agreement wins
4. application submitted_at, ascending
5. applicant_id, ascending, guarantees a total order
Exclude CRITERION_FLOOR and below-line applicants
Each unmatched applicant proposes to their top department not yet rejecting them
Department provisionally holds its top C proposals, rejects the rest
Any proposals remaining
Yes
No
Stable matching reached, identical on every re-run
Below the line: rejected
Unmatched above the line: waitlisted, ranked per department
Matched: selected with department
Write decisions, allocation_method algorithm
Manual override
Yes
No
New decision version, mandatory reason, audited, original retained
Release advisory lock
Ready for dual-control lock
